DETAILED ACTION

1. Claims 1-23 remain pending in the instant application.

Allowable Subject Matter

2. Claims 1-23 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art of record includes " Learnable Visual Keywords for Image Classification" Joo-Hwee Lim, hereafter "Lim" and De Bonet (US 5,899,999) hereafter "De Bonet" While both Lim and De Bonet teach semantic categorization of multimedia documents, the goal of Lim and De Bonet are to provide an open-ended set of semantic descriptions which can later be searched for. The instant application instead points to an implementation that fingerprints the documents themselves and belongs to a single fingerprinted category. The above limitation would cause the semantic search of De Bonet and Lim to be nearly inoperable as the open ended nature of categorization of the above mentioned art is what provides the ability to process user queries. Other art of interest is Tsurubayashi et al (US 5,404,299) which provides a concept dictionary similar to that of the instant application. Tsurubayashi however is solely used for text searching and does not incorporate the "multi-dimensional" similarity fingerprinting of the instant application. Additionally of interest is Hamada et al. (US 5,426,708) which literally analyzes images of human fingerprints. Of interest is the method by which it analyzes the image which includes shape and pattern recognition on what can be considered a multi-dimensional

level. The implementation of Hamada does not disclose decomposing a granularity for fingerprint distinction such as what is disclosed in limitation "e" of claim 1 in the instant application. Because the claimed language includes all of the steps including those of identifying terms, "determining a number of desired concepts," "decomposing a set of terms" "structuring a concept dictionary" and "constructing a fingerprint base" which is not wholly disclosed by the cited prior art and the prior art either specifically or inherently teaches away from portions of the claimed language the claimed language of the instant application is deemed to be allowable.

The dependent claims which are definite and enable by the specification and being further limiting to the independent claims are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
